

MATHEMATICS READERS

"I thoroughly enjoyed all of the 5th grade readers. I can share the same feedback for all of them. They are student friendly, very relevant, incorporate real-life information and situations, incorporate higher level thinking, the Math Talks are appropriate and engaging. "The Battle Between 2-D and 3-D takes learning the content to another level. The graphics are inviting and will motivate students to read the articles. The topics are informative and inviting. I would recommend these readers to 5th grade teachers and believe students will enjoy them all."
